PROFESSIONAL SUMMARY

Dynamic and motivated professional with a solid foundation in **retail management**, seeking to leverage extensive experience in **customer service** and **team leadership** into a career in software development. Demonstrate a strong aptitude for technology with proven skills in **C#, desktop**, and **mobile application development**. Self-taught programmer with additional formal training in **software development methodologies**, complemented by hands-on experience in project-based environments.

Eager to contribute to innovative projects, with a keen interest in developing **user-centric solutions**. Proven ability to **learn new technologies rapidly** and apply them to solve complex problems, aiming to bring a unique perspective to software development through a blend of retail management experience and technical expertise.

SOFTWARE PROJECTS

MyPlanogram - Mobile Application for Carole Crocket: Developed using C# MAUI and MySQL, this mobile app aids in stocking items on shelves and provides information about prices and offers, enhancing navigability and user engagement.

Water Billing Management System for Rudy Wiens: A desktop application crafted with C# WPF and SQLite, designed to monitor, manage, and send invoices based on tenants' water consumption, showcasing my ability to handle complex data management tasks.

Skip Management System for One Call All LTD: Another desktop application developed using C# WPF and SQLite, focused on streamlining the operations of loading and unloading skips, demonstrating my skill in optimizing logistical operations.

PROFESSIONAL EXPERIENCE

Web Software Developer Trainee at JustIT London (*Aug. 2023 – Nov. 2023*): During this tenure, I honed my skills in HTML, CSS, JavaScript, and Python, reflecting my commitment to continuous learning and applying new web development principles and rules.

Assistant Store Manager at Poundland London (*Sept. 2018 – Jul. 2023*): Responsibilities included maintaining strong partnerships with the Store Manager, analysing sales results, leading staff performance reviews, and optimizing store performance. I've also leveraged my app development skills to improve stock item location and customer service levels, indicating my ability to apply technical skills in a retail management context.
